### **DETAILED ACTION**

The following is a response to the amendment filed on September 15, 2005 which has been entered.

#### ***Response to Amendment***

Claims 1-4 and 18-20 are pending in the application. Claims 5-17 have been cancelled.

-The objection to claims 3 and 4 has been withdrawn due to applicant amending these claims to correct dependency and typographical errors.

#### ***Response to Arguments***

Applicant's arguments, see pages 5-7, filed September 15, 2005, with respect to the Watanabe et al reference lacking a controller calculating a load value applied to the transmission as claimed have been fully considered and are persuasive. The 103(a) rejection of claims 1-3 has been withdrawn.

#### ***Allowable Subject Matter***

Claims 1-4 and 18-20 are allowed. The following is an examiner's statement of reasons for allowance: The prior art of record does not disclose or render obvious a motivation to provide for:

-a hydraulic drive having an electric actuator of a hydraulic transmission controlled by a controller that calculates a difference between an actual command current value of the actuator and a memorized command current value of the actuator to obtain a value of load applied to the transmission wherein the memorized value is

determined supposing that load is not applied to the transmission and in combination with all the remaining limitations of claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
